

**Climate Change Litigation:
*Analysing the law, scientific
evidence & impacts on the
environment, health & property***

DR J SMITH & PROFESSOR D SHEARMAN

216 pages | Paperback | September 2006
ISBN 0975725440 | Presidian Legal Publications | \$AUD 79

...an excellent introduction to the topic...

- UK Environmental Law Association, *E-Law* journal, Issue 33, December 2006

... a timely, well researched resource that will be of great value to anyone with an interest in the topic – be they a potential plaintiff, defendant, judge or observer in the gallery.

- John Scanlon, Vice Chair, IUCN Commission on Environmental Law, Sydney (Foreword)

...an excellent all-round introduction to this topic... highly original... the book will make a substantial contribution in a field of growing importance.

- Dr Paul Babie, Lecturer, School of Law, University of Adelaide

The book has broad compass and seeks an admirable integration of scientific knowledge... and legal processes.

- Prof Anthony McMichael, Director, National Centre for Epidemiology & Population Health, Australian National University, Canberra & co-author of WHO's *Climate Change & Human Health: Risks & Responses* (Foreword)

...a very readable and important book outlining the emergence of a new weapon to tackle the crisis of global warming, detailing the various legal realms through which governments and corporations could be held accountable...a very forthright dissection on the voluminous evidence for global warming thus far accumulated, and a clear appraisal of the position of the climate change sceptics.

- Pat O'Neil, Friends of the Earth in *Chain Reaction*, Issue 99 Mar 07

As an academic, general practitioner and public health physician I found great value in the multi-disciplinary approach found in this book. It is original in content...well referenced and thought provoking...The effect of global warming and ecological change on human health is a great challenge, exploring the public and private legal options will be of great interest to many.

- Dr Nigel Stocks, Acting Head & Director of Primary Health Care Research Evaluation & Development Program, Dept of General Practice & Associate Dean (student) Medical School, University of Adelaide
